

Docket #: 500-194

Atom Economic Asymmetric Aldol and Related Reactions

Applications

- **Fine chemicals** - synthesis of chiral intermediates
- **Pharmaceutical synthesis** - natural products and small molecules
- **Agrichemical synthesis**

Advantages

- **Versatile** -
 - Reaction works with a variety of ketones, nitroalkyls, carbonyls, and imines
 - Catalyst can be used for aldol, nitroaldol, and other reactions
- **Inexpensive** -
 - High atom economy of reaction
 - Low cost of chiral ligand
 - Catalyst utilizes low cost metal
- **Easy** - chiral ligand readily available
- **Non-toxic** metal in catalyst
