Docket #: S06-419

Tagging Objects in Panoramic Videos

This user interface enables a user to define tags within virtual tour applications that label objects in panoramic images and video – a process that has been very difficult to achieve prior to this invention.

Applications

- Mapping
- Interactive video
- Virtual tours

Advantages

- Robust
- Multiple segmented videos

Publications

- System and method for tagging objects in a panoramic video and associating functions and indexing panoramic images with same US patent Application US20080106594
